Y2K INFORMATION TECHNOLOGY DIRECTIVE

SUBJECT: Moratorium	NUMBER: 2000-03
REFERENCES: Governor's Executive Order D-3-99; Y2K Information Technology Directive 1999-02, and Management Memo 99-10	DATE ISSUED: February 3, 2000
	SUPERSEDES: Y2K Information Technology Directive 1999-02

To: Agency Secretaries
Department Directors
Chief Information Officers
Year 2000 Project Managers

From: DEPARTMENT OF INFORMATION TECHNOLOGY

The tremendous effort dedicated to Year 2000 (Y2K) over the last few years is essentially complete. The lack of serious Y2K problems experienced thus far by state entities validates everyone's hard work.

To facilitate moving forward, the moratorium established in Y2K Information Technology Directive 1999-02 is now rescinded. In order to continue Y2K readiness, especially through the February 29 leap day, entities should continue good management practices when making changes to Information Technology systems.

In planning for new projects, please remember that the Governor's Executive Order D-3-99, implemented by Management Memo 99-10, remains in effect. Departments requesting approval for new projects expected to commence before July 1, 2000, must submit an Executive Order D-3-99 Exemption Request form along with the appropriate project documentation required for new projects as part of the SIMM process.

If you have any questions on the moratorium on configuration changes, please contact Don Heath at (916) 445-7611. If you have questions on the Executive Order D-3-99 Exemption Requests or on initiating new projects, please call Ginger Scalia at (916) 445-7612.

JEFFREY R. PELL
Chief Deputy Director
Department of Information Technology
